1 HEAD	Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.
2 ARM LENGTH	Let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.
3 CHEST / BUST	Measure under your arms, around the fullest part of your chest.
4 WAIST	Measure around your natural waistline, keeping one finger between the tape and body.
5 HIPS	Across the widest part of the seat.
6 INSEAM	Without shoes, from the crotch to the floor.

CE AND SAS-TEC

CE CERTIFICATIONS

Let's face it, getting riding gear and equipment that will protect you on the road can be complex. With a wide variety of different laws, certifications, and rating systems, it can all become very confusing very fast.

However, you can ride assured when you see the CE symbol on your Can-Am gear. These products have gone through significant testing and meet the stringent requirements necessary to earn this certification.

All of our CE certified items have passed the following tests: impact abrasion resistance, tear strength, seam strength, wash testing, and chemical testing.

So when you see the CE mark on your Can-Am gear, you can ride with peace of mind knowing your equipment has you covered.

CE

SAS-TEC PROTECTORS

Our riding jackets include removable SAS-TEC protectors in the shoulders and elbows, as well as a zone for a back protector (sold separately). SAS-TEC protectors are low-profile, modular, and most importantly, highly effective shock absorbers.
